

COMPETITION POOL REPLACEMENT UPDATE

AUGUST 2026

HIGHLIGHTS

We may be in the dog days of summer, but the heat has not slowed down our pace or progress. Our crews have reached our maximum excavation depth and have started the work to replace and upgrade critical systems in the building such as drainage piping, electrical conduits, and mechanical systems. These new systems will help ensure the longevity and reliability of the new pool for many years to come. It will also set the stage for our work this fall when we will install brand new lighting, HVAC, and, of course, the new pool itself.

CURRENT WORK

Task	Status	Expected Completion
Install shoring around pool	COMPLETE	JULY 2026
Replace sections of exterior pool walls to prevent future moisture issues	IN PROGRESS	FALL 2026
Upgrade drainage piping, electrical conduits, and mechanical systems	IN PROGRESS	ONGOING
Install structural foundation for pool	STARTING SOON	

NEXT STEPS

In the coming weeks, work will continue on the exterior as we prepare to replace the waterproofing and air barriers behind the building façade. When completed, this work will help improve overall building comfort and energy efficiency.
